SANDIP SWAIN

Software Engineer / Frontend and Python Developer

sandipswain25800@gmail.com +91-9178986744 Bhubaneswar, Odisha

github.com/Sandip1904 huggingface.co/sandip25800

PROFESSIONAL SUMMARY

Results-driven Computer Science graduate with hands-on experience in building web applications and AI-powered tools using Python and modern web technologies. Demonstrated ability to develop secure, scalable, and user-focused systems including cybersecurity platforms and intelligent URL analysis tools. Strong problem-solving mindset with a focus on clean code, performance optimization, and real-world application development. Seeking an entry-level Software Engineer / Python Developer role.

EDUCATION

B.Tech in Computer Science & Engineering, 2022 – 2025
Adarsha College of Engineering, Angul (BPUT) Angul, India

Diploma in Mining Engineering, 2016 – 2019
Purnachandra Institute of Engineering & Technology

TECHNICAL SKILLS

Languages
- Python
- JavaScript

Frameworks & Tools
- Gradio
- Git
- GitHub
- VS Code

Core Concepts
- Object-Oriented Programming
- REST APIs
- Authentication Systems

Other
- Debugging
- Responsive Design
- Problem Solving

Web Technologies
- HTML5
- CSS3
- React.js

Libraries & APIs
- Requests
- BeautifulSoup
- Hugging Face APIs

Cybersecurity
- URL analysis
- input validation
- secure design basics

LANGUAGES

English
Proficient

Hindi
Proficient

Odia
Native

STRENGTHS

Core Competencies

- Strong analytical and problem-solving skills
- Fast learner with high adaptability
- Ability to build real-world projects independently
- Passion for continuous improvement and technology

PROJECT EXPERIENCE

AI-Powered URL Safety Scanner

- Developed an intelligent system to classify URLs as Safe, Suspicious, or Malicious
- Integrated API-based analysis and rule-based detection for improved accuracy
- Designed an interactive UI using Gradio for real-time user input and feedback
- Focused on security insights and user awareness

Cybersecurity Awareness & Threat Detection Platform

- Built a web application to analyze suspicious emails, websites, and potential scam inputs
- Implemented validation logic and threat indicators to improve detection reliability
- Structured educational content to promote safe online practices
- Designed for usability and accessibility across devices

E-Commerce Web Application (React.js)

- Developed a dynamic e-commerce platform with product listing and cart functionality
- Implemented component-based architecture and client-side routing
- Optimized UI performance for faster rendering and smooth navigation

Online Examination Portal

- Built a secure exam system with authentication and role-based dashboards
- Implemented input validation and data handling for integrity and reliability
- Designed intuitive UI for both students and administrators

Food Delivery App (Frontend Prototype)

- Created responsive UI with intuitive navigation and user-friendly flows
- Designed ordering and tracking interface to enhance user experience
